

## Greatest Engineer In The Last Decades

When it comes to discussing such topic, I can think about only one person who has invented a plenty of useful devices and some kind of stuff. I myself know a lot of greatest engineers who are good at their field, but none of them are better than one person, who is the founder, engineer, CEO and CTO and chief designer of **SpaceX**, with net worth of 93.7 billion dollars, **Elon Musk** .

He was born to a Canadian mother and South African father and raised in Pretoria, South Africa. He briefly attended the University of Pretoria before moving to Canada when he was 17 to attend Queens University. He transferred to the University of Pennsylvania two years later, where he received dual bachelor's degrees in economics and physics. He moved to California in 1995 to begin a Ph.D. in applied physics and material sciences at Stanford University, but dropped out after 2 days to pursue a business career.

He is well-known for his famous corporation **Tesla Motors**, and **SpaceX**. Recently on May 30, 2020, SpaceX launched its first crewed flight called Demo2 becoming the first private company to both place a person into orbit and to eventually dock a crewed space-craft with the ISS. Further, the launch was the first time since the end of the Shuttle Program that an American astronaut has been launched from American soil on an American rocket.

I assume that he is one of the geniuses like Bill Gates, who is really worthy of respect. By the year of 2050 he plans to colonize about 80000 people to Mars, in order to ensure, is there a possibility to live on Mars, because as he thinks there is no clue to carry on living on Earth and after a couple of decades the life on Earth will not be the same as a hundred years ago.

Finally, when I was flicking through the YouTube, I came across a video of his **Tesla Model S**. Actually, the **Tesla Model S** when it was on autopilot, it dodged a tire which was coming to the car with a high speed. The driver did not even get what happened. By this video and his achievements in engineering field, I can safely say that he is a gifted one
